

# Jessica Hayden

## Data Automation & Analytics Specialist

856-905-2120 | jlynnne.hayden@gmail.com

<https://www.linkedin.com/in/jessica-hayden85/> | <https://github.com/jlynnne2004>

### **Professional Profile**

Adaptive Healthcare Data Analyst who thrives with minimal supervision, collaborating with clinical and operational teams to rebuild broken ETL pipelines and deliver automated reporting solutions that last. Resourceful in situations where scope is undefined and leverages AI tools alongside SQL, Python, and healthcare domain expertise to optimize delivery without sacrificing data quality and accuracy.

### **Technical Skills**

**Domain Expertise:** Data quality assurance, healthcare operations, revenue cycle, clinical performance metrics, HIPAA compliance, data governance

**Data & Analytics:** SQL Server, Azure Data Studio, MySQL, PostgreSQL, Excel (advanced; automated report generation via openpyxl, xlswriter)

**Programming & Automation:** Python (pandas, numpy, pyodbc, openpyxl, xlswriter, matplotlib, smtplib, streamlit), C# (working knowledge), automated report generation, ETL pipelines, Git, AI-assisted development (Claude, ChatGPT, GitHub Copilot), JSON

**Quality Assurance & Compliance:** Issue tracking, root cause analysis, SLA adherence, HIPAA Safe Harbor standards

**BI & Visualization:** Power BI, Tableau

**Project Management & Collaboration:** JIRA, Agile methodologies, cross-functional team collaboration

### **Work Experience**

#### **Healthcare Data Consultant | Jess Hayden Consulting**

Cherry Hill, NJ | May 2025 – Present

*Launched an independent consulting practice specializing in healthcare data quality, HIPAA compliance, and reporting automation for healthcare organizations.*

- Developed and launched HIPAA de-identification and healthcare data audit service offerings via Fiverr.
- Built consulting website and service offerings targeting healthcare data quality and HIPAA compliance clients.
- Actively pursuing IBM Data Analyst Professional Certificate to deepen expertise in data visualization and analytics tooling.
- Expanding professional networking through LinkedIn engagement and regional data community events.

## **Data Automation Analyst (hired as Junior Reporting Analyst) | Persante Health Care**

Mt. Laurel, NJ | Dec 2021 – May 2025

*Sole analyst across seven departments at a hospital sleep lab management company, partnering with the Development team to lead organization-wide reporting automation.*

- **Workflow Automation:** Automated 30+ recurring and ad hoc reporting workflows using SQL, Python, and Excel, *reducing manual effort by up to 85% across 7 departments.* **Cold Feed Pipeline:** Automated sleep study data delivery with SQL and Python, consolidating PDFs and secure FTP transfer; reduced processing from 2 hours to 5 minutes and eliminated document misfiling.
- **Technical SME:** Took sole responsibility for physician interpretation templates in C#, independently resolving 50+ tickets related to sleep study variable mapping and SQL queries during an organizational gap.
- **Data Integrity:** Led deduplication initiative *resolving 1,500+ duplicate physician IDs*, restoring accurate patient-provider matching across the network.
- **Clinical Analytics:** Analyzed patient cancellation patterns *across 30 hospital clients*, identifying insurance denial trends that enabled leadership to adjust referral strategies and improve completion rates.

## **Operations Analyst (hired as Migration Coordinator) | InsPro Technologies Eddystone, PA | May 2014 – May 2019**

*Entry-level role for insurance administration software company that expanded organically into operations and data analysis support following company-wide restructuring.*

- **Migration Validations:** Coordinated system migration testing across multiple client implementations, validating data integrity and system functionality.
- **Financial Analysis:** Analyzed daily GL and weekly claims extract discrepancies in Excel, delivering actionable reports for client review and resolution.
- **Validation & QA:** Collaborated with development teams using Agile methodologies and JIRA to track open validation issues, documenting root cause and resolution to ensure accurate and timely system deployments.

## **Key Projects**

### **HIPAA De-Identification Pipeline | PostgreSQL, Python, Faker, Streamlit | 2026**

- Designed a HIPAA Safe Harbor de-identification pipeline implementing masking, redaction, and tokenization (checksum/hash) across normalized PostgreSQL tables with role-based access control preventing PHI/PII exposure
- Built a Streamlit application automating PHI/PII detection, compliance scoring (0-100), and multi-mode de-identification engine for healthcare data privacy

## **Education & Certifications**

- Associates of Science in Business Administration | Camden County College
- IBM Data Analyst Professional Certification | Coursera | In Progress (expected mid-2026)
- SQL (Basic) Certification | HackerRank | 2026
